High Frequency Case Data

This vignette covers the traditionally collected case data during the high frequency period. This case data has four different metrics of cases over a period of 55 weeks.

The data is broken down by site and date. Site is where the sample was collected from a range of 10 locations. For each date and site there are four metrics of case data. These generally agree but have some slight variation. In this data a case number of less then 5 is represented with -999 for privacy.

Below is the first 6 rows of the dataset

date	site	ReportedCases	EpisodeCases	CollectedCases	ConfirmedCases
2020-10-30	Hudson	NA	NA	NA	NA
2021-01-04	Hudson	NA	NA	NA	NA
2021-01-07	Hudson	NA	NA	NA	NA
2021-01-10	Hudson	NA	NA	NA	NA

date	site	ReportedCases	EpisodeCases	CollectedCases	ConfirmedCases
2021-01-12	Hudson	NA	NA	NA	NA
2021-01-14	Hudson	NA	-999	NA	NA

We used this data set in some analysis [here](#)
