

## Example Data Vignette

Kyllan Wunder

#Example data This data is only meant to be used in vignettes or testing. To view the full data use:  
data(WasteWater\_data, package = "DSIWastewater")

This data comes from our wastewater and case data merged together by site and date. Then filtered with by 3 sites; Green Bay, Janesville, and Mauston. Then a new column is added; `geo_mean` which is the geometric mean of `N1` and `N2`. This gives roughly 500 rows to work with for examples across different sized sites over a large time frame.

This columns are all the same as the wastewater data. [https://github.com/AFIDSI/DSIWastewater/blob/main/docs/data/data\\_disc.md](https://github.com/AFIDSI/DSIWastewater/blob/main/docs/data/data_disc.md)
