Interceptor data

This vignette covers the traditionally collected case data for the Madison interceptors. This case data has three different metrics of cases over a period of 55 weeks. This dataframe is sufficiently out of date it is recommended it is not used.

```
library(DSIWastewater)
library(dplyr)
library(ggplot2)

data(InterceptorCase_data, package = "DSIWastewater")
head(InterceptorCase_data)
```

##	Date	Site	EpisodeCase	SpecCollectedCase	FirstConfirmed
