Intercepter case data

Interceptor data

This vignette covers the traditionally collected case data for the Madison interceptors. This case data has three different metrics of cases over a period of 55 weeks. This dataframe is sufficiently out of date it is recommended it is not used.

```r
library(Covid19Wastewater)
library(dplyr)
library(ggplot2)

data(InterceptorCase_data, package = "Covid19Wastewater")
head(InterceptorCase_data)%>%
  head()%>%
  knitr::kable()
```
